Look for Corporate participation, firm participation

Metalworking

We are looking for a participation or takeover of a metalworking company in the area, CNC milling, CNC turning, CAD/CAM, toolmaking. If individual parts are not possible, we can contribute accordingly. We ourselves are a successful medium-sized company with our own products which we sell throughout Europe. Our development and design is also connected to our own metal processing with modern CNC machines. We would like to expand and optimize these and are therefore looking for a long-term partner with potential. We can imagine a participation, takeover or even age succession.
