Electrical engineering or electric drive technology

Look for a company to take over as a successor. The company should be in the field of electrical engineering, drive technology or engine repair. I am an electrical engineer and have 12 years of experience in electric drive technology with BLDC+ gearboxes and asynchronous drives up to 400kW. I have insight into the entire vertical range of manufacture in the manufacture of such drives. I am currently supervising tests of the drives in which I have carried out the electrical design. The company should be within a radius of about 60 km at .
