Offer Corporate sales, firm sales, sales **Car detailing / car wrapping**

An established company in the vehicle detailing/vehicle enhancement industry is seeking a new owner. The company has been in operation since 2003 and has built a reliable customer base consisting of both private and corporate clients. It has also formed various certified partnerships and collaborations. The company is located in a central and well-known area, with a strong presence among car enthusiasts in the Nuremberg region and its surrounding areas.

The main areas of focus for the company include vehicle enhancement/detailing, including various sealing techniques (such as ceramic coatings), vinyl wrapping (including paint protection film), preparation of leased vehicles, dry ice cleaning, etc. The facility features separate detailing bays with specialized lighting.

We are looking for a competent successor to take over this established company in the detailing/vehicle enhancement industry. All partnerships and existing customer base will be transferred to the new owner.

The company's premises comprise a hall with high ceilings, electronic entrance, over 350 square meters of workspace including a separate office area, etc. There is potential for expanding the service portfolio, such as incorporating paintwork services. Additionally, a separate washing bay is available. The company possesses multiple car lifts, separate bays with specialized lighting for detailing, and all necessary equipment required for the industry.

We are seeking a competent individual to take over the business. The possibility of a partial ownership takeover may be considered. The current owner and managing director would be willing to remain in the company during a training phase to ensure a smooth transition, integrating the new owner into existing processes and serving as a point of contact.
