Metal construction company for aluminium processing

The company for sale was founded in 1977 as a locksmith's shop and in 1996, after moving to an industrial park, was transformed into a manufacturing metal construction company with a focus on aluminium processing. In addition to the business, the property and the property on it are also to be sold. The company employs seven full-time metalworkers and two administrative staff, one of whom is part-time. If necessary, we cooperate with freelance workers from the industry for galvanizing and powder coating. Within the company, there are already employees who have expressed their desire to take over the future management.

Depending on the order situation, sales are between 1.2 million and 1.4 million euros. The prospects for the coming years are good. The existing infrastructure allows for growth to € 2.5 - 3.0 million without having to expand spatially.
