Business for sale more than 15 years

ID 25201

Offer Corporate sales, firm sales, sales **Trade Uninterruptible Power Supply**

The main activity of the company to be sold is the sale of uninterruptible power supplies, project planning, implementation and commissioning. In addition, the Research & Development department deals with customer-specific adaptations of solutions based on uninterruptible power supplies.

Founded in the 1990s, the company has since dedicated itself to providing its customers with an interference-free power supply. Thanks to the experience and special knowledge of the employees, all requirements, from simple to very complex, can be implemented. The focus is on the individual conception of the projects and the associated well-founded advice to the customers. During the implementation of the projects, emphasis is placed on compliance with applicable specifications, standards and certifications as part of an accompanying quality assurance process.
