## Look for Corporate financing, investor **Software development**

I am currently in the process of setting up a company differently (better) and here there are some opportunities for every investment horizon.

The minimum programme is a loan of approx. 12,000 to 15,000 euros in financing for the current summer season with a short term of less than 12 months.

A customer base with current sales is available. In addition, a filled CRM system with leads and presentable solutions from the B2B sector.

I look forward to a non-binding exchange.
