Software / Digital Services

Capital of 30-50K euros is being sought for the implementation of a learning app. I offer a professional top team for implementation, a well-known partner who takes over the marketing in advertising cooperation and a profit sharing.

To the app. The learning app offers a completely new way to learn musical instruments and combines fingering, sheet music and visual representations in a special learning player. Thanks to technical innovations such as a remote learning system, even complex pieces can be learned effortlessly. It is particularly noteworthy that we are currently the only ones to offer such a solution specifically for keyboard instruments such as the accordion and the Styrian harmonica – for these, but for many other instruments, there are no comparable learning methods so far. Our app will be the first learning player for keyboard instruments that integrates all learning methods at the same time, and is intended to serve as a basis for other instruments.
